## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

Claims 1, 3, 9, and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 & 3 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: The invention is directed to transferring thermal energy contained in flash steam to feed water and transferring thermal energy in blow down water to a mass of water, the claims appear to state the inverse of this.

In regards to claims 9 & 11, the invention by way of the specification disclose a conduit directing flash steam into a tank containing feed water so as to transfer heat energy contained in the flash steam to the feed water. The specification describes "mass of water" and a tank containing feed water as separate entities.

Claims 2, 4-8, 10, and 12-16 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
